

National Technology Day

National Technology Day at VECC was celebrated on July 17, 2012 during the final day after the month long training program of the summer trainees from various engineering colleges of the country. Students on completion of their successful training presented their individual projects in the form of short lectures. About 42 groups, each consisting of 2-4 students, lectured on their projects which were followed by visits to the various labs of the centre. Dr. D. K. Srivastava, Director of the centre delivered a special lecture on “Why to do research?” followed by a lecture by Dr. V. S. Pandit, Head Accelerator Physics Section on “Accelerators and Cyclotrons”.
